‘Over view of Public Health England in Greater Manchester’

Professor Martyn Regan, Centre Director
Origins of Public Health England

Healthy Lives, Healthy People white paper
- Published November 2010 to set out a new approach to public health
- Responsibility for local health improvement returned to local authorities from 1 April 2013
- Public Health England is the expert national public health agency which fulfils the Secretary of State for Health’s statutory duty to protect health and address inequalities, and executes his power to promote the health and wellbeing of the nation.

Health and Social Care Act 2012
- Set the legislative framework for the changes to the health and care system that led to the creation of Public Health England as an operationally autonomous executive agency of the Department of Health
- Received Royal Assent 27 March 2012
Mission

“To protect and improve the nation’s health and to address inequalities, working with national and local government, the NHS, industry, academia, the public and the voluntary and community sector.”
What we do

Public Health England:

- works transparently, proactively providing government, local government, the NHS, MPs, industry, public health professionals and the public with evidence-based professional, scientific and delivery expertise and advice

- ensures there are effective arrangements in place nationally and locally for preparing, planning and responding to health protection concerns and emergencies, including the future impact of climate change

- supports local authorities, and through them clinical commissioning groups, by providing evidence and knowledge on local health needs, alongside practical and professional advice on what to do to improve health, and by taking action nationally where it makes sense to do so
Structure – Public Health England
Local presence

Four regions, 15 centres

Eight Knowledge and Intelligence Hubs
- London
- South West
- South East
- West Midlands
- East Midlands
- North West
- Northern and Yorkshire
- East

Other local presence
- ten microbiology laboratories
- field epidemiology teams

Additional support
- Local teams can also draw on national scientific expertise based at Colindale, Porton Down and Chilton
## Local focus

**15 CENTRES**
- Led by a senior public health professional
- Deliver services and advice around the three domains of public health
- Support local government and local NHS action to improve and protect health and reduce inequalities with intelligence and evidence
- Deliver the local input to emergency preparedness, resilience and response

**4 REGIONS**
- Led by a senior public health professional
- Ensure quality and consistency and responsiveness of centres’ services and advice
- Support transparency and accountability of the system
- Assurance of emergency planning and response
- Workforce development
- Contribute to the national public health agenda
Place-based approach to public health

Non-statutory providers* → People and communities → Health and wellbeing boards → Local government → CCGs → NHS providers

- PHE centre
- Local government
- CCGs
- NHSE area team
- EPPR
- Screening and immunisation
- Offender public health programmes
- Specialised commissioning
- Primary care public health programmes and population healthcare

Public health advice

*Including voluntary and community sector
Our priorities for 2013/14

- Sets out Public Health England’s priorities and actions for the first year of our existence
- Five outcome-focused priorities – what we want to achieve
- Two supporting priorities – how we will achieve it
- 27 key actions to take now
- The start of the conversation – a three-year corporate plan will follow
Outcome-focused priorities

1. Helping people to live longer and more healthy lives by reducing preventable deaths and the burden of ill health associated with smoking, high blood pressure, obesity, poor diet, poor mental health, insufficient exercise, and alcohol.

2. Reducing the burden of disease and disability in life by focusing on preventing and recovering from the conditions with the greatest impact, including dementia, anxiety, depression and drug dependency.

3. Protecting the country from infectious diseases and environmental hazards, including the growing problem of infections that resist treatment with antibiotics.

4. Supporting families to give children and young people the best start in life, through working with health visiting and school nursing, family nurse partnerships and the Troubled Families programme.

5. Improving health in the workplace by encouraging employers to support their staff, and those moving into and out of the workforce, to lead healthier lives.
Supporting priorities

6. Promoting the development of place-based public health systems

7. Developing our own capacity and capability to provide professional, scientific and delivery expertise to our partners
Near real-time mortality in Greater Manchester: compared to England
12-month mortality gaps; as at February 2012 and February 2013
Welcome to the GMCA & AGMA Web Site

The ten authorities in Greater Manchester are the first in the country to develop a statutory Combined Authority which will co-ordinate key economic, development, regeneration and transport functions. The Greater Manchester Combined Authority (GMCA) was established on the 1 April 2011.

To help drive towards those transport functions a new Transport for Greater Manchester Committee was created.

The Association of Greater Manchester Authorities (AGMA) continue to act as the voice of the ten local authorities of Greater Manchester but as part of a much stronger partnership with GMCA.

The governance arrangements have been developed in order to boost economic performance and help deliver a brighter future for Greater Manchester and the North West so that by 2020, the Manchester city region will have pioneered a new model for sustainable economic growth based around a more connected, talented and greener city region where the prosperity secured is enjoyed by the many and not the few.

Greater Manchester Strategy

Vision
By 2020, the Manchester city region will have pioneered a new model for sustainable economic growth based around a more connected, talented and greener city region where all our residents are able to contribute to and benefit from sustained prosperity.

Outcomes
- We will secure our place as one of Europe’s premier city regions, synonymous with creativity, culture, sport and the commercial exploitation of a world class knowledge base;
- Compete on the international stage for talent, investment, trade and ideas;
- Be seen and experienced as a city region where all people are valued and are able to fully participate in and benefit from the city region’s success;
- Be known for our good quality of life, our low carbon economy and our commitment to sustainable development;
- Create a city region where every resident, neighbourhood and every borough can contribute to and benefit from our shared sustainable future;
- Continue to grow into a fairer, healthier, safer and more inclusive place to live, known for excellent, efficient, value for money services and transport choices;
- Deliver focused and collegiate leadership of Greater Manchester based around collaboration, partnerships and a true understanding that through collective and individual leadership we are strong.

Outcomes delivered by our priority actions are underpinned by our key drivers of GROWTH and REFORM

<table>
<thead>
<tr>
<th>Creating the conditions for growth</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Diversify our economic base in response to the changing market, using evidence and working with businesses to open up land and infrastructure in locations where the markets want to go.</td>
</tr>
<tr>
<td>2. Develop a market-facing investment strategy, understanding the offer required to attract investment destinations responsive to market demand and using public resources in the most effective way.</td>
</tr>
<tr>
<td>3. Create a blueprint for our town centres, applying creative approaches to redevelopment of the offer.</td>
</tr>
<tr>
<td>4. Review land supply to support growth in those locations most attractive to the market, developing spatial options which meet our evidenced future demand for housing and employment land.</td>
</tr>
<tr>
<td>5. Attract and retain talent by creating places where people want to live, through the stimulation of the housing market and delivery of a high quality residential offer.</td>
</tr>
<tr>
<td>6. Masterplan and deliver the investment necessary in the existing and critical infrastructure required to support growth.</td>
</tr>
<tr>
<td>7. Improve Greater Manchester’s connectivity locally, nationally and internationally, investing in our strategic transport network.</td>
</tr>
<tr>
<td>8. Leverage Greater Manchester’s science and technology assets, capitalising on the needs of the changing global market.</td>
</tr>
<tr>
<td>9. Strengthen the global distinctiveness and world ranking of Manchester as a place to invest, live and visit.</td>
</tr>
</tbody>
</table>

Business
10. Grow the business base by providing integrated and effective support through the business-led growth hub.
11. Improve the international competitiveness of Greater Manchester’s firms, developing an evidence base and exploring new partnerships.
12. Seize the economic growth potential of the global drive towards a low carbon economy and increased resource efficiency.

Worklessness and skills
13. Deliver an employer-led skills system, collaborating with employers to understand future skills needs and design programmes which match those needs.
14. Broaden the opportunities available to young people to reduce youth unemployment, providing access to the right education, training, information, advice and guidance.
15. Implement an integrated and flexible approach to the provision of employment and skills support to enable jobless residents to enter work and progress.

Reducing dependency and demand
16. Co-design with Whitehall a ‘shadow’ place settlement from April 2013 with the potential for a full settlement a year later or to coincide with the next spending review, based on the following principles:
- Taking a Greater Manchester-wide approach which clearly adds value to reform at district level, particularly to those issues identified in our Community Budget proposals to reduce current and future dependency: early years, troubled families and transforming justice.
- Reform of the health and social care system based on significantly improving outcomes from specialist acute services and delivering a substantial reduction in unplanned admissions to hospital and other care institutions.
- Deployment of common tools and techniques to support cross public service leadership at scale, including cost benefit analysis, investment agreements and data sharing.

Reducing Dependency and Demand

• Taking a Greater Manchester-wide approach which clearly adds value to reform at district level, particularly to those issues identified in our Community Budget proposals to reduce current and future dependency; early years, troubled families and transforming justice.

• Reform of the health and social care system based on significantly improving outcomes from specialist acute services and delivering a substantial reduction in unplanned admissions to hospital and other care institutions

• Deployment of common tools and techniques to support cross public service leadership at scale, including cost benefit analysis, investment agreements and data sharing
Developing a shared vision for Greater Manchester

The Greater Manchester Public Health Network is an alliance of key stakeholders who work collaboratively to improve the health of people living and working in Greater Manchester and reduce health inequalities.

Greater Manchester is a vibrant and dynamic conurbation, but the population of Greater Manchester suffers from some of the worst health in England. The network is tasked to identify and take action on public health priorities. A Director of Public Health has been identified to lead on each of the priority areas.
Public Health England’s overall mission will be:

• to protect and improve the health and wellbeing of the population,
• to reduce inequalities in health and wellbeing outcomes.

It will do this in concert with the wider health and social care and public health system, and with key delivery partners including local government, the NHS, and Police and Crime Commissioners, providing expert advice and services and showing national leadership for the public health system.

“Public Health England will exist to serve the system, a system led locally by elected members”
