

Appendix 1: The Need for Primary School Places 2022-25

Heywood

Until 2019/20 the number of reception pupils arriving in Reception classes had been significantly higher than the number being born in the area (figure 1). In September 2020 pupil numbers started dropping and September 2021 numbers look to have dropped again. This reflects the significant drops found in other local authorities in both Greater Manchester and nation-wide. In Heywood it may also be linked to a decrease in new house completions. Current forecasts show a peak for 2023/24 with intakes decreasing following birth rates through to 2025/26.

Figure 1: Heywood Reception intake forecast

The predicted spare capacity in Reception class is expected to grow to 2025/26 (figure 1 & figure 2). Previous bulge classes created at Harwood Park Primary School will be removed.

Middleton

Middleton reception pupil numbers are due to peak again in 2023/24 and numbers of pupils coming from new housing developments are increasing in the area. Figure 3 also shows school census intake numbers and on roll numbers at the end of the academic year.

Figure 3: Middleton Reception Intake forecast data

There is a predicted shortage of Reception capacity from 2022/23 to 2024/25, and a continuation of the bulge class in Hollin Primary is needed. Further additional capacity for 2023/24 will also be needed with a permanent expansion possibly needed at a Middleton school.(figure 3).

Pennine

The applications to schools in north Pennines have dropped significantly (figure 5). It is believed this is due to local factors; including a temporary drop in the number of new house completions, the rebuilding of Littleborough Primary and the delay in the new Secondary school. The current spare capacity will be kept under review.

Schools in south Pennines have in the past seen intakes closer to the underlying birth rates and there the current capacity is sufficient to meet the underlying birth rates (figure 6). Capacity will be kept under review.

Rochdale

Rochdale Township includes almost half of children educated in Rochdale Borough. For school place planning purposes this has been split up into four areas as shown in figure 9 below. Data is shown for two zones; North West and North East Rochdale combined and Central and South West Rochdale combined.

Figure 9: Rochdale Borough Primary Planning Areas

Figure 10: Forecast for North East and North West areas of Rochdale Township.

A peak in the combined area of Rochdale NW and NE Reception classes intakes due to birth rates occurred for 2020 intake and the current forecast shows similar levels of need for 2022/23, before dropping for 2023/24. Underlying birth rates in NE Rochdale indicate that current cohorts are due to peak again in 2024/25. In the NW Rochdale area births numbers have dropped from 322 for 2019/20 intake and will reach 284 for 2025/26 intake. This suggests a current level of spare capacity in NW Rochdale that maybe unsustainable. Any reduction in PAN will undergo a full consultation process as required.

Figure 11: Spaces and Expected pupils in North-east Rochdale

Figure 12: Spaces and expected pupils North-west Rochdale

The birth rate in the SW and Central Rochdale area has zigzagged for several years and pupil numbers have not followed this trend. There is currently sufficient capacity predicted over the combined area although, as shown in Figure 13, the number on-roll in Reception class increased by 33 pupils during last year in the area due to the very high rates of in-year applications.

Figure 13: Reception Forecast for Rochdale Central and South-West areas.

Rochdale Central and SW Reception classes are forecasted to have spare capacity for the next 4 years (figure 13 & figure 14). Spare capacity needs to be maintained because of in year applications centrally and new housing coming forward in the SW area.
